WORK EXPERIENCE

Graduation project on React (internet store): april 2023

- created a full-fledged frontend application using ReactJS.
- created components, pages, sorting, searching, pagination, filtering.
- interacting with the server-side, the requests are sent to the backend.
- created a global data repository for the entire application.
- search optimized for all products.
- created adaptive.

Skills: JS, SCSS, React, Redux Toolkit, React Router, Axios + Fetch, React Content Loader, React Pagination, Debounce.

Graduation project on JS (game): february 2023

- created a game on Canvas.
- multimedia (audio) capabilities of JavaScript are used.
- using smooth object animations on a large area, including on mobile devices.
- using OOP.
- the project is a SPA.
- the web application interacts with the user (processing key combinations, swiping on mobile devices).

Skills: JS, Canvas, OOP, SPA
